- Distribution and Manufacturing
- Human Resources and Payroll
- Customization

## STARSHIP

To achieve and maintain strong customer loyalty, it's essential to get your inventory in the hands of your paying customers as quickly and economically as possible. MAS 500 allows you to do just that with StarShip, an innovative add-on module.

StarShip, built by V-Technologies, integrates tightly with MAS 500 and makes the entire shipping process more fluid. StarShip helps your company become a more competitive distributor and even has the potential to reduce shipping and shipping-related expenses of small parcel shipments.

StarShip automates the shipping process by:

- Calculating freight charges through the use of an optional integrated scale.
- Rate shopping between carriers to find cost-reduction opportunities.
- Supporting third-party parcel insurance to cut parcel insurance costs.
- Printing carrier-approved, bar-coded shipping labels and COD tags at the warehouse workstation for convenience and speedy processing.

The bi-directional MAS 500 StarShip Link is easy to use. Turn the page to see how it can maximize productivity in your busy warehouse.
