TIMESHEET PROFESSIONAL

Automated Time and Expense Tracking for Project-oriented Businesses

TimeSheet Professional for MAS 500 is a project-oriented time and expense tracking solution – ideal for businesses that need to electronically track projects and collect data on the actual time spent and the expenses incurred on each task. Along with seamless integration with Project Accounting, TimeSheet Professional for MAS 500 adds sophisticated time data collection to all major financial, project management and payroll systems.

Easy to install and administer, this comprehensive solution for internal or remote workgroups of any size helps track time and expenses by many user-defined levels, including employee, department, client, project and individual task. Timesheet Professional supports a robust approval mechanism that allows organizations to configure an approval process that matches their internal procedures and policies. Plus, TimeSheet Professional for MAS 500 is easily adaptable to any organization's project structure and workflow.

For over a decade, thousands of organizations have relied on TimeSheet Professional as their time tracking software to provide up-to-the minute analysis on project budget costs, estimated time-to-completion and resources. By enhancing the Project Accounting solution with TimeSheet Professional for MAS 500 capabilities, customers can improve billing cycles, increase cash flow and streamline expense reimbursement by leveraging automated Accounts Receivable and Accounts Payable invoicing generation facilities.

MAS 500 Timesheet Professional

"(With Timesheet Professional) We've seen a solid ROI from a management effectiveness standpoint, as well as in real dollars. Not counting the additional revenue we're receiving from previously unbilled sources, we've seen a more than 13% increase in our returns from outside clients over last year."

FEATURES:

Total Integration with Project Accounting

Seamless integration with Project Accounting helps your company:

- Establish a single entry point for resource, project, phase and task information
- Dynamically assign tasks to project teams
- Leverage the automated billing and expense reimbursement facilities
- Ensure up-to-date project information flows to all team members

User Friendly Time and Expense Tracking

Take advantage of powerful time and expense tracking abilities that will help your company:

- Track a virtually unlimited number of employees clients, projects, phases and tasks
- Track each project's details with notes
- Define tasks with start and stop dates
- Track tasks with Work Breakdown Structure (WBS) codes
- Display tasks with Gantt bars
- Summarize employee or task information with the roll-up feature

Windows PC or Web-based Interface

Both a PC and web-based timesheet interface means that you'll have:

- Easy access to project assignments for onsite and remote team members anywhere in the world
- Quick connectivity even when using multi-platform environments, since the web browser interface supports both Windows and Macintosh workstations
- Reduced numbers of desktop applications that your IT department supports by using the web-browser module
- Less time spent on administrative tasks by automating daily or recurring tasks associated with employees, tasks, and data.

Time-Saving Workflow Approval Process

User configurable approval steps enhance the workflow by:

- Allowing for multiple approval steps based on company procedures and policies
- Notifying managers and employees through email that specified levels in the approval process have been met
- Providing a single entry point for reviewing and approving timesheets and expense claims across project teams

Comprehensive Reporting for More Accurate Project Analysis

Robust reporting tools in TimeSheet Professional for MAS 500 improve your company's analytic capabilities and allow you to:

- Run reports in the TimeSheet Professional browser module for easy export to other applications for further analysis and review
- Utilize summary reports, including an easy-to-use wizard that walks you through the report creation process
- Create PDFs of reports for distribution via email and web browser
- Forecast resources and compare costs quickly and easily
- Analyze resource utilization across projects

Fully Customizable to Meet Unique Project Tracking Needs

Meet and exceed your company's unique project tracking needs when with a solution that:

- Expands for virtually unlimited employee capacity
- Maintains names, groups, dependency rules, security profiles and pay rules
- Allows for customized terminology
- Defines custom security profiles for entering time and adding tasks
- Modifies specific tasks and component fields rather than overwriting an entire record
- Allows for up to 10 custom fields to track data for each phase or task
