

SAGE CRM SALESLOGIX

CRM and Accounting Integration

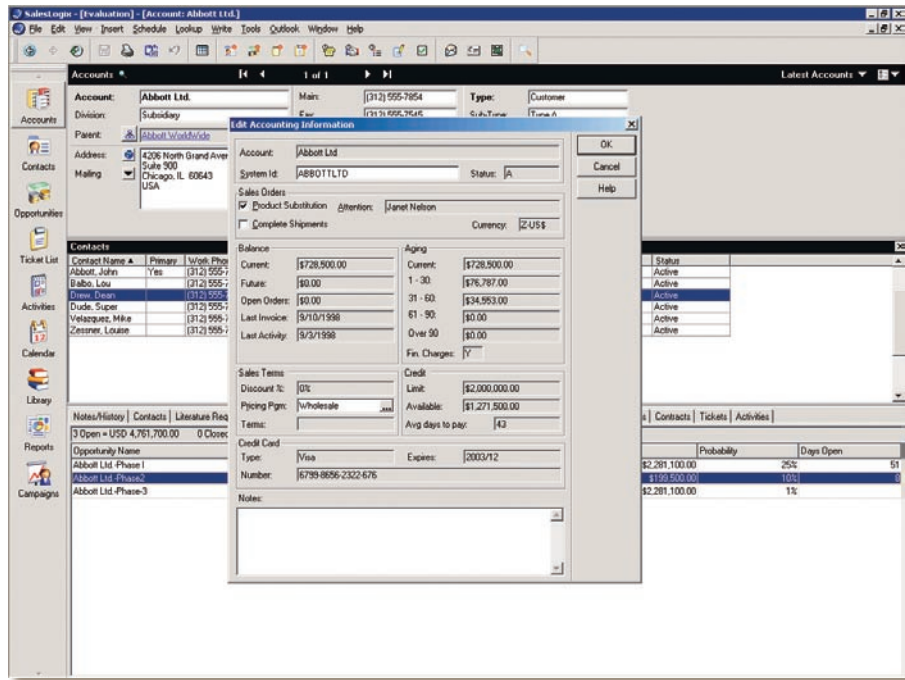

CRM AND ACCOUNTING INTEGRATION

Sage CRM SalesLogix is an integrated customer relationship management (CRM) suite that includes Sales, Marketing, Customer Service, and Support solutions. Sage CRM SalesLogix offers integration with multiple back-office accounting and financial applications.

FEATURES

Integration between Sage CRM SalesLogix and back-office accounting and financial applications provides organizations with a complete view of all customer interactions for making more insightful business decisions.

- Accounting Information
- Invoice History
- Open Invoices
- Open Orders
- Payments/Receipts
- Product Information
- Inventory
- Pricing
- Groups and Reports
- Orders and Quotes

Sage CRM SalesLogix Accounting Integration enables you to view accounting information such as open orders, aging A/R, and credit limits from within the familiar Sage CRM SalesLogix interface.

Access to Critical Back-Office Customer Data

Integration between Sage CRM SalesLogix CRM and your back-office accounting application provides your sales professionals access to the most current product information, pricing, discounts, and inventory when creating quotes or taking orders. In addition, without having to leave Sage CRM SalesLogix, they can view all relevant customer data, such as credit status, terms, and account balance so they can better service customers.

Increased Efficiencies in Accounting

Integration reduces the time and resources required of Accounting to support your sales team. Integrated front and back-office systems reduce duplicate data and order entry. And, by driving current product pricing and discounts into Sage CRM SalesLogix from your back-office system, the number of inquiries from Sales regarding product, orders, invoices, and outstanding balances will be reduced.

Timely Customer Service

In the end, not only will your organization benefit from CRM and accounting integration, but so will your customers. Sales representatives have access to complete customer information when handling inquiries and placing orders. And because processes between your CRM and accounting systems are automated, orders move to accounting more quickly and customers receive product sooner, which will positively impact your organization's customer satisfaction.

Sage CRM SalesLogix

CRM and Accounting Integration

"Sage CRM SalesLogix allows us to review orders from customers all over the world on a daily basis. We can review activity on a daily, weekly or monthly basis and see exactly which products have shipped and confirm that the shipments were on time. Our sales people have all the information they need when talking to customers."
